

# Client Connect Recommended Settings

## Browser and Operating Systems

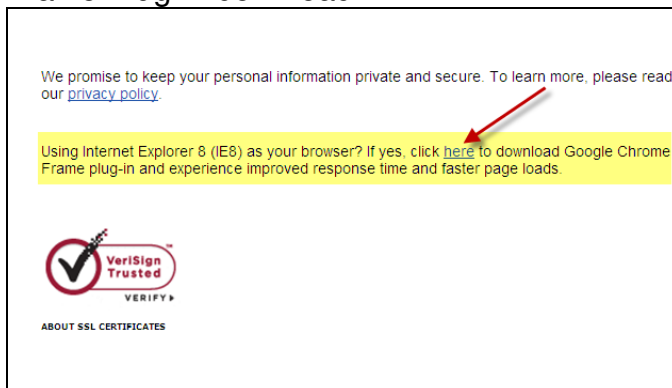

To ensure a satisfactory experience, Client Connect has been verified for compatibility for use with the following browsers and operating systems. This information is also contained within Client Connect Help.

Compatible Browser	Compatible Operating Systems
IE8.0*	Vista, Windows XP, Windows 7
IE9.0	Vista, Windows 7
Firefox 3.6, (latest version)	Vista, Windows XP, Windows 7
Google Chrome (latest version)	Vista, Windows XP, Windows 7
Safari v4.0, v5.0	Mac OS X v10.6 "Snow Leopard"
Safari v5.0, v5.1	Mac OS X v10.7 "Lion"

### If you use IE8 as your Client Connect browser:

We recommend that you take advantage of Google Chrome Frame plug-in. It improves the performance of IE8 resulting in faster page loading, response time and a better view. You need to load Google Chrome Frame Plug in from the Client Connect log in site.

At the Client Connect log in site, look for this link to begin the Google Chrome Frame Plug-in download.

Details: Downloading Chrome Frame plug-in is free and easy, requiring a few mouse clicks and a few minutes of your time. A link, added on the Client Connect Log In page, provides single-click access to download Chrome Frame plug-in for use in Client Connect. Since applications must allow the Chrome Frame plug-in within the architecture of the product, downloading the plug-in is not expected to impact other applications on the PC.
